The Division received an application for renewal of Conditional Major permit F-01-043 (Revision 2) on November 7, 2006. Weyerhaeuser Company currently operates a flexographic printing and platemaking facility in Richwood, Kentucky. The changes that have occurred since issuance of permit F-01-043 on May 9, 2002 are (1) a name change and (2) a permit revision to replace an existing plate developing machine with a Cyrel Batch Processor, model 300BP, a Grieve Drawer Oven, and a PRI Plate-Vac model PV-500. The renewal application indicates that no additional changes have occurred that require consideration in the air quality permit.

This facility is exempt from the requirements of 401 KAR 59:212, Section 3(2) by meeting the condition of utilizing inks with an emission limit of five-tenths (0.5) lb VOC/lb solids as delivered to the applicator as specified in 401 KAR 59:212, Section 6(4). The actual VOC emissions shall not exceed 50.0 tons per rolling twelve month period.

On January 18, 2007 the public notice on availability of the draft permit and supporting material for comments by persons affected by the plant was published in *The Florence Boone County Recorder* in Florence, Kentucky. In addition, notification of the issuance of the draft permit was sent to the U.S. EPA January 12, 2007 via e-mail. The public comment period expired 30 days from the date of publication. No comments were received during this period. The permit is now being issued final.
